

Corporate Floors LEEDs the Way!

Corporate Floors is the leading sustainable flooring company but that's not new.

- For over 12 years, we have used MilliCare, the most environmentally sensitive cleaning process for your carpet and textiles.
- Creating the states first carpet recycling company, Texas Carpet Recycling
- The first flooring company in the state to divert ALL carpet from ALL commercial projects from landfill.
- In 2008 alone, TCR diverted over 1000 tons of carpet from the land fill (2,000,000 s/f)
- The first commercial flooring company in the Metroplex to be Green Advantage Certified
- The first to have a LEED AP on staff (Dee Cassell).
- Through our partnership with American Forests, we have planted over 1500 trees with their ReForestation program by planting one tree for every ton of carpet diverted and for every signature we receive at our trade shows
- In 2008 we saved over 731,995 gallons of water by using MilliCare over hot water extraction.
- MilliCare is the first dry cleaning process to be certified by the CRI as a deep extraction cleaning system and the first to be Green Seal Approved
